IoT monitoring — multi-unit	\$1,200/yr (\$100/mo) · install incl.	Multiple sensors · 60-day free pilot to start

HOW WE WORK	
FAA Part 107 certified · \$1M insured (COI on request) · NDAA-compliant · same-day to 24-hour delivery · independent — we inspect, we don't sell repairs. Scope: MW AIRLIFT™ provides visual (and, where equipped, thermal) aerial documentation of observable, accessible conditions only. This is not a licensed building inspection, structural evaluation, or engineering certification, and should not be relied upon as such; a licensed professional is recommended where certification is required.	

Referral — two tracks: Give \$25, Get \$25 (referred client gets \$25 off their first paid job; referrer gets \$25 off their next service; one credit per referred client, not combinable) · Contractor track: refer a contractor who becomes a paying client — 15% off your next 3 inspections. Bundles are flat-priced and not further discountable (referral credit is the sole post-bundle exception).
